Read first time, rules suspended, read second time, made second time, made special order, for September 23rd, 1919, after reading the Journal.

The Chief Clerk of the House called the roll of the House and a quorum was present. The Secretary of the Senate called the roll of the Senate and a quorum was present.

A special committee appeared within the bar of the House accompanied by the Governor who at once proceeded to deliver his message which was as follows:

TO THE MEMBERS OF THE FORTY-SECOND GENERAL ASSEMBLY:

GENTLEMEN:

By virtue of the power and authority vested in me by Section 19, Article 6, of the Constitution of Arkansas, I have called the Forty-second General Assembly in extraordinary session for the second time to consider the following important propositions:

1. The enactment of such laws as may be necessary to decrease the high cost of living.
2. The enactment of such laws as will enable cities and towns to collect and additional tax from motor vehicles to be used for street purposes.
3. The enactment of such laws for establishing local road, bridge, drainage, and school and levee improvement districts, and amending and curing defects in existing special local laws for the same, and ratifying, confirming and validating local improvement districts organized under general or special laws, and the enactment of such laws as will permit the reconstruction or extension through improvement districts of waterworks systems, to the end that cities and towns or new territory taken therein may be supplied with adequate service.
4. The appropriation of a sufficient sum to pay for services rendered and expenses incurred during the biennial period ending March 31, 1919.

The people of the State and the hard-working membership of this General Assembly will recognize that it could have only been an extraordinary occasion and a very grave emergency which induced the Governor to convene your Honorable Body in special session for a second time within the short space of less than two months. I recognize that our citizenship, generally speaking, are ordinarily opposed to special sessions of the legislature, and a body, that has so industriously and patriotically devoted itself for 64 days, since January 13th last, at a personal sacrifice to serve the best interests of the State, must necessarily feel the hardship for a second call for an extraordinary session. But I am persuaded that an emergency, "a condition and not a theory, confronts us" and that I would be a derelict in my duties as Governor, did I not request your Honorable Body to consider matters of very grave present and future consequence to our commonwealth. In my opinion, the problem of reconstruction are as weighty and as clamorous for solution as the grave issues which confronted us during the recent war itself. Among these problems, the one which most vitally affects the people of our Nation and our State is that of the high cost of living and its corollary, the cost of high living. Government statistics show that families without and \$1,800 income, are under-nourished, so great is the cost of food and clothing; admittedly several factors have contributed to the present high cost of living; First, the inflation of our currency. Second, our large exportations abroad, which have brought the American consuming public in competition with the foreign consuming public. Third, labor shortage, which has resulted in a relative shortage of production. Fourth, monopolies and hoarding of supplies, raw materials notable in the case of hides. Fifth, profiteering on the part of unscrupulous dealers in the necessities of life. I do not mean that this reference to profiteering applies to our dealers generally, for the great bulk of our merchants and traders are honest and are themselves confronted with the most serious problems of trade and industry that have ever confronted the commercial world. Selling prices are necessarily high, because of the tremendous expense of doing business; replacement costs are higher than ever before, because of the inability of merchants to obtain the necessary stocks of goods for their trade; wages are higher than ever before - and all of these elements must fairly be taken into account in the estimation of overhead expense, but to use the Laconic phrase of Grover Cleveland, "a condition and not a theory confronts us"; there are profiteers; there are combinations in restraint of trade; there are flagrant instances of consumers being made the unreasonable victims of a high-priced economy. I believe that conservative laws should be enacted by the State,

independent of the Federal Government, designed to prohibit the hoarding of the necessities of life and the extortion of unreasonable profits. I have consulted conservative business men, and they advise me that statutes can be drawn, which would segregate the profiteer for the great body of honest merchants and traders. I believe the Circuit Courts should be given exclusive original jurisdiction of profiteering; that the hoarding of food stuffs in cold storage plants should be prohibited for a longer period than one year and that the date on which these foodstuffs are put into cold-storage should be stamped upon the commodity; and that it should be made unlawful for any retail merchant, wholesale merchant, jobber, broker or other person engaged in commerce within this State to sell any article of dry goods, groceries, foodstuffs, hardware, lumber, medicine or any other article usually sold in due course of trade on which a higher average net profit is charged than the usual custom profit charged on said article or a similar article of trade or merchandise throughout the country. I, therefore, respectfully recommend to your Honorable Body that you earnestly consider the wisdom of the passage of an anti-profiteering law, and that you frame such a law along the lines which I have indicated. In my opinion, this legislation will alleviate to a very great extent the intolerable suffering of the great majority of our people, and at the same time will do no injustice to legitimate business.

America's militant and victorious battle for the great ideals of liberty and democracy has emphasized the ideal of social justice, which must be recognized in co-operative relations between labor and capital. Unless the American capitalist co-operates with the American labor to reduce the high cost of living and the cost of high living, and unless the American laborer co-operate with the American capitalist to relieve labor shortage and eliminate all forms of Bolshevism and anarchism, I fear that we will be on the brink of a social and industrial revolution, beside the horrors of which the French Revolution will pale into insignificance. American and Arkansas capitalists should eliminate all elements of profiteering, and American and Arkansas labor should eliminate paid agitators, walking delegates and every semblance of Bolshevism. A proper and a generous co-operation between the mighty factors of labor and capital is absolutely necessary to insure the stability of our economic structure and avert the dangers which now threaten the American Republic.

The second object of the call is the enactment of such laws as will enable cities and towns to collect additional tax from motor vehicles to be used for street purposes. This was recommended to the Governor by the Convention of Mayors, who stated that cities of the second class and incorporated towns, without the right to levy privilege taxes were in many instances without adequate revenue. This tax on motor vehicles is eminently fair, particularly as the proceeds would be used for street purposes.

Your general Assembly, in my opinion, immortalized itself by responding to the sentiment of the public in favor of good roads and by the creation of 168 special road improvement districts, for which bonds were authorized, aggregating approximately \$70,000,000, in a regular legislative session, limited to 60 days. It is not strange that technical defects should have crept into some of these laws, which would invalidate the improvement districts so far as the scale of bonds is concerned.

The third object of the call makes it possible to cure these defects, to ratify, confirm and validate local improvement districts, organized under general or special laws. This applies not only to local road improvement districts, but also to bridge, drainage, levee and school districts and permits the consolidation of waterworks improvement districts. Urgent requests

have been made to the Governor by over thirty counties for corrective and remedial and, in some instances, new legislation on these subjects. It has been stated that these progressive counties, if they are compelled to wait upon the convening of the 43rd General Assembly, would be "in the mud" for over two years, unless relief is granted them this special session; that children in several school improvement districts within our State will be without school buildings and adequate school facilities, and in some instances absolutely without schools, unless relief is granted; that some levee, drainage and bridge districts cannot be financed without corrective legislation; and that several cities and towns in our State would be without adequate waterworks systems, unless consolidations are effected and new territory taken in so as to supply them with adequate service.

The fourth item in the call, stated in general terms, provides for the relief of several assessors and other state and county officials for whom appropriations were not made by the regular session of the 42nd General Assembly for the biennial period ending March 31st, 1919. In view of the splendid and efficient work rendered by these officials, and the wisdom of the State meeting promptly its obligations, without the issuance of deficiency proclamation by the Governor, it is nothing but right that the relief asked for in this item be provided by your Honorable Body at this session.

May I urge in conclusion that your deliberations be marked by energetic promptitude of action and the avoidance of the unnecessary delay in discussion, to the end that your deliberations may be accomplished within the shortest time possible, keeping in mind, as I am sure you will, that every day's additional time entails additional expense upon the State, and makes it more difficult for the Governor to keep biennial expenditures within revenues and maintain the State upon an absolutely cash basis, as it is at the present time.

My pleasant and profitable associations with you, during the regular session of the 42nd General Assembly and the last special session, have convinced me that you are a body of men to whom the interests of the State can be safely entrusted, and that you are animated in your actions by exalted patriotism and unswerving devotion to public duty.

Very respectfully submitted,

Chas. H. Brough, Governor.

The President read the following communication from Senator Wilson and the leave of absence was granted:

September 21, 1919.

Hon. Ben F. McFerrin and other Senators,

Little Rock, Arkansas.

Gentlemen:-

It will be impossible for me to be with your body during this session - the first part at least - so I ask of you an indefinite leave of absence.

We still have some road knockers who are trying to get the road law for Calhoun County repealed.

Will you as a personal favor send it (the bill to repeal) so far into the region of dead bills that it can never be revived?

When such a bill to repeal is introduced I make a motion through you that it be tabled and I hope you do it very gracefully.

I assume all responsibility and I hope the Senate will sustain me. I don't want any repeal.

With best wishes for a good session, I am,

Cordially,

(Signed) W. A. Wilson.

On motion of Senator Alexander the Senate at 3:15 P.M. took a recess for the purpose of hearing the Honorable S. M. Williams, Chairman of the Federal Highway Council, on the subject of Highways.

Senate Memorial Resolution No. 1, by Senator Cazort,

Whereas, the building of highways has had an enormous growth for the past few years throughout the length and breadth of our country, every state in the American Union recognizing the commercial and agricultural importance of these highways, and

Whereas, it appears that a National Highway Commission is imperative for the studying of methods of building and upkeep, the question of inter-state traffic and the importance of federalizing the road building throughout our country, to which the states would correlate and finally would reach and tie together the smaller highways into a general system of highways throughout the United States.

Now therefore, be it resolved that the Senate, the House concurring, memorialize Congress to support Senate Bill No. 1309 known as the Townsend Bill for the creation of the Federal Highway Commission and for the interest of the National System of Highways.

Be it further resolved that a copy of these resolutions be sent to each member in Congress from this state. Cazort.
